

Publication of DASR Non-Technical Skills (NTS) regulation Present, Suitable, Operating and Effective (PSOE) assessment indicator methodology

This Newsbreak is to advise that DASA has published the NTS PSOE evaluation methodology to the [DASA Flight Operations website](#) to assist the Aviation Safety community with validation of their NTS OIP updates for compliance.

The four PSOE assessment indicators are used to determine whether an organisation is compliant with a DASR requirement. They provide a structured way for DASA to assess whether:

- the required process, procedure, document, resource, or control exists (Present)
- what exists is adequate and appropriate to meet the DASR requirement (Suitable)
- the process or procedure is actually being used as intended (Operating)
- the process or procedure is achieving the required outcome (Effective).

The DASA point of contact is Deputy Director FLTOPS (DAVNOPS-DASA), at dasa.fltops@defence.gov.au.

For further information on the DASR NTS transition activity, please refer to the following:

- [Advisory Circular 02/2026 v2.0 – Transition to DASR NTS](#)
- Regulatory Document – NPA for DCP 0088/26 – *DASR NTS*.
