

Aviation Incident Investigation Course (AIIC) replaced by Introduction to Aviation Safety Investigation (IASI) (218957)

DASA wishes to advise the Aviation Safety community that the Introduction to Aviation Safety Investigation (IASI) (218957) course will replace the Aviation Incident Investigation Course (AIIC) (215188) from 01 November 2026.

IASI has been developed as a blended learning course, comprising an ADELE self-paced online component and a face-to-face practical component. The self-paced online component takes approximately three hours to complete, while the face-to-face component is conducted over four hours.

DFSB Education and Training (ET) retains primary responsibility for delivery of IASI. Aviation Commands can identify members to deliver the course on behalf of DFSB in accordance with the Learning Management Plan. To be authorised as an IASI instructor, members must have successfully completed the Aviation Safety Officer course, hold a recognised instructional qualification, possess investigative experience using the Defence Safety Analysis Model (DSAM), and, have experience preparing aviation safety reports using Sentinel.

The process for requesting courses remains unchanged with Aviation Commands required to notify DFSB ET. DFSB ET will continue to manage nominations and enrol students in the ADELE component for all IASI courses, regardless of presenter. The ADELE component will be created and students enrolled approximately two weeks prior to the scheduled face-to-face training activity.

For further information, please visit the DFSB intranet site or contact the DFSB Education and Training Team at dfsbet@resources.defence.gov.au
