Latest edition of *Spotlight* available now!

The latest edition of *Aviation Safety Spotlight* magazine is now available to read online.

Contents include:

New ways of thinking about risk: Part 1: A close call during a C-130J training sortie prompts the writer to consider how risks accumulate.

Getting the mission done safely: A Navy aircrew evacuates civilian workers from a remote island in the path of a tropical cyclone.

Just enough realism: Army Aviation adopts innovative virtual-reality technology for its helicopter safety training.

What are we missing? Analysing Qantas Flight QF1, the writer asserts it is humans, not systems, who make flights safe.

Equipping our international partners: DFSB's International Aviation Safety Officer course improves the safety capabilities of Australia's allies.

Crashworthiness lessons from the Second World War: Wartime research forever changed how aviation engineers approached survivability.

Why didn't he eject? The writer explores why an Australian pilot did not eject from his doomed Sabre during the Korean War.

Review: *The Killing Zone*: Australian Defence aviators can benefit from the survival lessons in this comprehensive textbook.
