

Defence Aviation Safety Authority

DASR SAFETY MANAGEMENT SYSTEMS – PRACTITIONER COURSE

Course Code

216450

Course Duration

1 day course. Advice on course timings will be in the joining instructions.

Course Content

This course aims to provide participants with practical knowledge on the DASR Safety Management System (SMS) and its application. The course contains information that helps develop an understanding of the following:

1. The Defence Aviation Safety Authority (DASA) and its structure;
2. The origin, applicability and definitions of the DASR;
3. The necessity of Aviation SMS for both the sustainment and continual improvement of aviation safety;
4. The key relationships and organisational interfaces within the regulated aviation community;
5. The DASR SMS components and elements; and
6. The DASR SMS assessment process.

Target Audience

The primary target audience is aviation community members who perform the role of Aviation Safety Manager within their DASA regulated entity. Members in roles that enable the functions of the entity Aviation SMS may find this course beneficial.

Course Prerequisite

CAMPUS – Introduction to Defence Aviation Safety (00014894) (PMKeyS: 217270) – Highly Desirable.

Sessions

- **Session:** 0021
