

Defence Aviation Safety Authority

AVIATION SYSTEM SAFETY INTRODUCTION (LEVEL 1)

Course Code

218062

Course Duration

2 hours

Course Content

Aviation System Safety - Level One is the first lecture in a series of three DASA Directorate of Initial Airworthiness sponsored, system safety training courses.

The course aims to introduce engineers and senior technicians to the prescribed ADF methodology for safe aerospace platform design and technical risk management principles.

It does not require previous knowledge of system safety concepts.

Target Audience

Engineers and senior technicians

Sessions

Sessions for this course are available on-demand through ADELE on the DRN via this link; [Course: P127674 - DASA - Aviation System Safety - Level One \(adele.edu.au\)](http://adele.edu.au/Course/P127674-DASA-Aviation-System-Safety-Level-One)

Cost

There are no participation costs for this course.

Proficiency

P127674 Aviation Systems Safety Introduction (Level 1)
