

New DASA Factsheet published – Synthetic Aviation Turbine Fuels

DASA wishes to advise that a new Factsheet has been published regarding Synthetic Aviation Turbine Fuels.

This factsheet provides guidance regarding the use of synthetic aviation turbine fuels within the Defence and Defence Aviation Safety Regulation (DASR) context. The aim of the factsheet is to provide guidance for the Military Air Operator (MAO) and the Military Type Certificate Holder (MTCH) organisation to ensure the use of synthetic aviation turbine fuels remains in-accordance-with the platform's Military Type Certificate (MTC). This factsheet also discusses the role of fuel suppliers, noting however, that these organisations are not DASA regulated entities.

This Factsheet can be accessed on the [DASA Advisory Circular and Factsheet](#) web page under the General topic.
