

## **New *Spotlight* magazine available online**

**The latest edition of Aviation Safety *Spotlight* magazine is available now on the DFSB Intranet site, DASA Internet site and ADF Electronic Flight Bag.**

The 52-page magazine features a mix of contemporary and historic articles exploring themes such as complacency, supervision and authorisation, prejudices, biases and preconceptions, aviator mental health, military pilot selection through history and the impact of temperature extremes on cognitive performance. *Spotlight* also celebrates safety champions, touches on Salus, Defence's safety intelligence capability, and the common challenges for the conduct of Defence aviation safety management systems.

Director DFSB GPCAPT David Smith says: "As you read this edition, I implore commanders, supervisors, managers and operations personnel to reflect upon organisational pressures to deliver capability, thence to question whether your organisation's risk management, supervision and authorisation policy, procedures and practices are robust and commensurate with the scale and complexity of aviation operations and activities being conducted."

If you would like a copy of the magazine, send an email to the Defence Flight Safety Bureau Publishing and Multimedia team mailbox [dfsб.рm@defence.gov.au](mailto:dfsب.рm@defence.gov.au)
