

DEFENCE AVIATION SAFETY MANUAL (DASM) THIRD EDITION 2021 RELEASE

DASA wishes to advise that the Defence Aviation Safety Manual (DASM) Third Edition 2021 was released on 01 Apr 21.

Third Edition 2021 involves the removal and inclusion of DASM content in order to better support commanders in meeting their ASMS requirements. Third Edition 2021 improves out-referencing to supporting documentation, removes content that can be resourced externally, and makes improvements to existing policy. The development of the DASM has been underpinned by a Project Management Plan (DPMP) and took a phased approach to ensure changes to this manual considered all stakeholders. Third Edition 2021 is the final phase of the DPMP, and future amendments will be managed through an enduring Forward Work Plan with an outlook of 3-5 years.

The DASM is online, authorised for use and can be found on the DPN only.
