

2024 ADF Aircraft Structural Integrity Symposium (AASIS) – Registrations and Call for Presentations Open

DASA are pleased to announce that registrations and call for presentations are now open for the 2024 Australian Defence Force Aircraft Structural Integrity Symposium (AASIS) to be held on 27-29 February 2024 at Defence Plaza Melbourne.

The AASI Symposium is the only dedicated forum for military Aircraft Structural Integrity in Australasia and is an excellent opportunity for organisations and personnel in the Aircraft Structural Integrity community to meet and share their knowledge, experience and lessons learned. As such, OEMs, Defence, Commonwealth employees, foreign military personnel, aviation industry and related parties are all invited to attend and provide presentations.

The theme for the 2024 Symposium will be centred around the four pillars of Aircraft Structural Integrity (ASI); Usage Monitoring, Fatigue Management, Structural Condition Monitoring & Environmental Degradation and will take an innovative look at Additive Manufacture.

Further information including registration forms can be found on the [DASA Events page](#).

Early registrations close on the 15th December 2023. Final registrations then close for presenters on 15th January 2024 and for participants on the 29th January 2024. There will be limited spots following the close of early registration, as such you are encouraged to submit your registration form by 15th December 2023.

This symposium is co-sponsored by the Defence Aviation Safety Authority (DASA) and the Capability Acquisition and Sustainment Group (CASG).
