

## ***Notice of Proposed Amendment (NPA) DCP 2022-032 DASR 21 NEW MDOA PRIVILEGES BASED ON EMAR 21 EDITION 2.0***

DASA wishes to advise that [\*Notice of Proposed Amendment \(NPA\) for DCP 2022-032 DASR 21 NEW MDOA PRIVILEGES BASED ON EMAR 21 EDITION 2.0\*](#), has been published for external consultation and welcomes responses from the wider Defence aviation community prior to 03 Feb 23.

The NPA proposes to include EMAR 21 edition 2.0 alignment for additional privileges for MDOA and holders of a type certificate. These privileges, to be awarded under specified scope and conditions, allow for certification of certain major changes to a Type Certificate (TC) (or to an Supplementary Type Certificate (STC)), issue of STCs, and approval of major repair designs. The changes lay a voluntary basis and only introduce a possibility to grant new privileges to approved organisations offering an opportunity and greater autonomy to Design organisations that possess deep skills, experience and competence.

The DASA views the change to be of low complexity, negligible impost, and EMAR aligned. As such, a shortened time-period (due to the end of year break) is considered not to preclude a comprehensive review and is warranted to support early establishment of efficiency gains.

Requests for additional information concerning this NPA should be sent to Mr Nik Cagorski, Acting Deputy Director Initial Airworthiness Regulation and Promotion, at [nik.cagorski@defence.gov.au](mailto:nik.cagorski@defence.gov.au).

The NPA can be found via the link:
