

***Spotlight* magazine available online**

The latest edition of [*Aviation Safety Spotlight*](#) magazine is now available on the DFSB Intranet site, DASA Internet site and ADF Electronic Flight Bag.

The 48-page magazine explores some of the most reported contributing factors in aviation safety – risk management, supervision and authorisation. This second [*Spotlight*](#) edition for 2023 also features articles related to authority gradients, fatigue and psychological episodes, and insights into Human Factors and Non-Technical Skills education and training to complement professional technical mastery.

Director DFSB GPCAPT David Smith encourages [*Spotlight*](#) readers to reflect upon their organisation’s approach to aviation risk management and the integration of practical skills-based NTS training, which often feature in aviation safety investigation reports as systemic and or organisational latent deficiencies within aviation safety management systems.

DFSB is grateful for the valuable contribution of articles from members of the Defence Aviation community who share lessons learnt from their own experiences.

If you would like a copy of the magazine, send an email to the Defence Flight Safety Bureau Publishing and Multimedia team mailbox dfsb.pm@defence.gov.au
