

## ***Notice of Proposed Amendment for DASR Change Proposal 2019-037 - Amendment of AMC and GM M.A.304(d) - Data for modifications and repairs (AUS)***

DASA wishes to advise that Notice of Proposed Amendment (NPA) for DASR Change Proposal 2019 - 037 – Amendment of AMC and GM M.A.304(d) - Data for modifications and repairs (AUS) – has been published for external consultation and welcomes responses from the wider Defence aviation community prior by close of business Thursday 18 Apr 24.

The intent of this change to DASR is to enable greater direct CAMO consumption of modifications and repairs, approved by a recognised authority, reducing unnecessary re-approval by Military Design Organisations (MDO) approved IAW DASR 21.

This update simplifies and clarifies the requirements for a CAMO to directly consume modifications and repairs, through recognition, IAW DASR M.A.304(d) and relevant annexes to recognition certificates. This update also removes classification of changes (an initial airworthiness activity) from DASR M and aligns the AMC M.A.304(d) with DASR 21.

The NPA can be accessed from the DASA [Policy Development Web page](#).
