

Defence Aviation Safety Authority

PHASED ARRAY ULTRASONIC TESTING (LEVEL 2)

Course Code

215952

Course duration

3 Weeks

Course Content

Training provides course participants with the basic skills and knowledge necessary to perform Phased Array Ultrasonic Testing. Theory is reinforced through practical application in a simulated workshop. Course participants are required to complete a Practical Workbook on course while gaining workplace training under supervision from a certified Level 2 or 3 NDI Technician.

Course Pre-Requisites

Sessions

- **Session: 0010**
 - **Date:** 14 October – 1 November 2024
 - **Location:** Amberley
 - **Nomination Closing Date:** 9 September 2024

Training Nominations

Defence Personnel: All ACT courses are registered on PMKeyS. When nominating for a course, the member's Unit Training Coordinator (UTC) or delegate is to nominate on PMKeyS. Due to limited course numbers it is recommended detailed amplifying comments and priority upgrade accompany all course nominations.

Contractors: In accordance with Defence Personnel Instruction (DPI) NO 3/2005 (Provision of Defence Training Support to External Service Providers) and DPI NO 445/2005 (Financial Transactions between the Defence Materiel Organisation and the rest of Defence that are not covered by the current Suite of Agency Agreements) civilian contractor nominations are to be forwarded and authorised through their relevant sponsoring System Project Office (SPO). Directorate Personnel - Air Force (DP-AF) will only accept nominations from the SPO's nominated liaison officer. Authorisation from the sponsoring SPO regards Course Cost Recovery must be given prior to nomination.

International course nomination: International course nominations are administered through Air Force Headquarters, International Engagement (Foreign Training) - Directorate of Strategy and Planning, Canberra, Tel: +61 2 6265 5533.

Course Paneling

Headquarters Air Force Training Group are the panelling authority for this NDT course.
